Features

General Handling

Applications

Construction, DIY, Factory, General Handling

A seamless knitted nylon liner with full nitrile coating on both sides and is also extremely low linting. The glove is extremely light and close fitting with a snug knitted wrist. A tough glove with outstanding dexterity and good dry grip for detailed assembly. This fully coated version also offers protection for the back of the hand. Ideal for light detailed assembly, inspection, light fabrication and small parts handling.

KIT

Lambay Nitrile Fully Coated Inspection Glove

Limitations of Use

The results of physical tests should help in glove selection, however it must be understood that actual conditions of use cannot be simulated and it is the responsibility of the end user and not the manufacturer to determine glove suitability for the intended use.

Storage Instructions

Gloves should be ideally stored in cool dry conditions in the original package and out of direct sunlight.

Maintenance Instructions

Both new and used gloves should be thoroughly inspected before being worn to ensure no damage is present. Gloves should not be left in a contaminated condition if reuse is intended in which case gloves should be cleaned as far as possible. This glove may be washed at less than 50 deg C using soap or detergent and tumble dried below 60 deg C. Care should be taken when removing gloves to avoid any contaminant contacting bare skin.
